Certain improvements have been made in the physical condition of the school buildings to keep them in servicable order. The most important change was made at the North Chapel School where an oil burner was installed to replace the old wood stove. This installation has proved to be entirely adequate and satisfactory. It is recommended that similar oil burning equipment be installed in the Burnham School, Iron Bridge School and Durell School this year. The situation as to toilets and water supply continues to be inadequate and unsanitary.

Two school buses have been operated, one at each end of the Town This transportation has been very satisfactory and has provided dependable service to the children living more than one mile from a school.

All teachers who taught for us last year returned again in September, 1949. Their work has been done in a consciencious manner and good results have been obtained. As long as we have the inadequacies of the unimproved one room rural school we cannot expect to provide maximum school opportunities for the children. However, the Town has supplied teachers generously with books and supplies.

All buildings are now used practically to capacity. Any increase in the number of children will demand increased facilities, or tuition payment to another Town for grades seven and eight. In the event that the seventh and eighth grades were sent out of town the Irving School should be closed.

The great need is for a new modern consolidated six room building. Citizens and Town Officers have been giving much time and thought to this question. The State Legislature has granted the Town the right to establish a School District for the purpose of increasing its debt limit in order to build a school. The Town will consider this problem at the Annual Meeting.

An alternate plan has been suggested by which partial consolidation might be brought about by renovating the facilities

of the Town Hall. Increased transportation cost is involved in either consolidation or conveyance to another Town.

Because of the limited facilities and large enrollment there is no sub-primary grade. The entrance age for Grade One is six years on or before December 31, following the September entrance.

I wish to extend my appreciation to School Committee, teachers and citizens for their continued cooperation.

Respectfully submitted,

February 15, 1950

PAUL LARRABEE,

Superintendent.

ANNUAL REPORT

ANNUAL REPORT OF THE PUBLIC HEALTH

NURSE, 1949

North Kennebunkport

During 1949 North Kennebunkport has been free of any serious epidemics. Is it because of more vigilance in the control of communicable diseases or better protection? We would like to think that both play an important part.

During the year monthly child health conferences were held and were attended by a total of 91 infants and pre-school children. Physical examinations were given to 18 infants and 38 pre-school children who took advantage of these conferences; 28 were protected against diphtheria; 14 against whooping cough, and 20 against tetanus; 33 smallpox vaccinations were given. Because of this protection there should be less incidence of these diseases in the community.

Physical examinations were given to 40 school children. Only five parents accompanied their children for these examinations. I would like to extend an invitation to all parents to accompany their children when the physical examinations are given. This should serve as an educational experience for the child in teaching him to assume some responsibility for his own health. No treatment is offered and if any defects are found the children are referred to their family physician. Forty-two visits were made to the various schools and 48 teacher-nurse conferences were held. Teachers have been very helpful in observing the children and referring any who have health problems. Fourteen home visits were made to cases referred by the teachers.

Audiometer tests were given to 86 children. Of this group three were found to have some hearing loss.

A total of 36 visits were made to prenatal cases and 22 visits were made after delivery. Health supervision of infants and pre-schools is a very important phase of the program. Home visits were made to 76 infants and 206 pre-school children.

There has been an increase in the bedside nursing program during the year; 131 home nursing visits and 26 office visits were made.

Under the sponsorship of your local Health Council blood typing was done and we now have a list of potential blood donors who have responded very well. More information about this service may be obtained by calling the nurse at Kennebunkport 470.

ANNUAL REPORT

It is necessary for the nurse working alone to have contact with others engaged in the same field and I have attended monthly staff meetings at the district office in Portland. Here a continuous program for staff education is carried on. I also attended the meeting of the American Public Health Association which was held in New York in October. I hope to give better service to the community because of the knowledge and stimulation gained at these meetings.

I would like to take this opportunity to thank all who have helped in the success of this program. I am especially grateful to the Selectmen, Health Officer, the Teaching Staff, Superintendent of Schools, and especially to the Members of the Health Council for their active support of the program. I hope the services will continue to expand during 1950.

Respectfully submitted,

Field Nurse,
